

Re: Industry agreement on STB power consumption

Having reviewed the document entitled “Voluntary Industry Agreement to improve the energy consumption of Complex Set Top Boxes within the European Community” version 2 dated 12 June 2009 [company name] confirms its indicative support for the approach outlined in that document. In principle we would be willing to sign up to an eventual industry agreement based on this document.

This note is merely as an indication. We do not and can not at this stage bind ourselves to supporting any voluntary approach.

We are happy for this note and to be shared with the European Commission and Member States experts involved with regulation under the EUP Directive, and other potential supporters of the voluntary agreement and/or for our indicative support to be communicated to them.
