

# About the Digital Interoperability Forum (DIF)

Digital  
Interoperability  
Forum

# DIF members - 2009

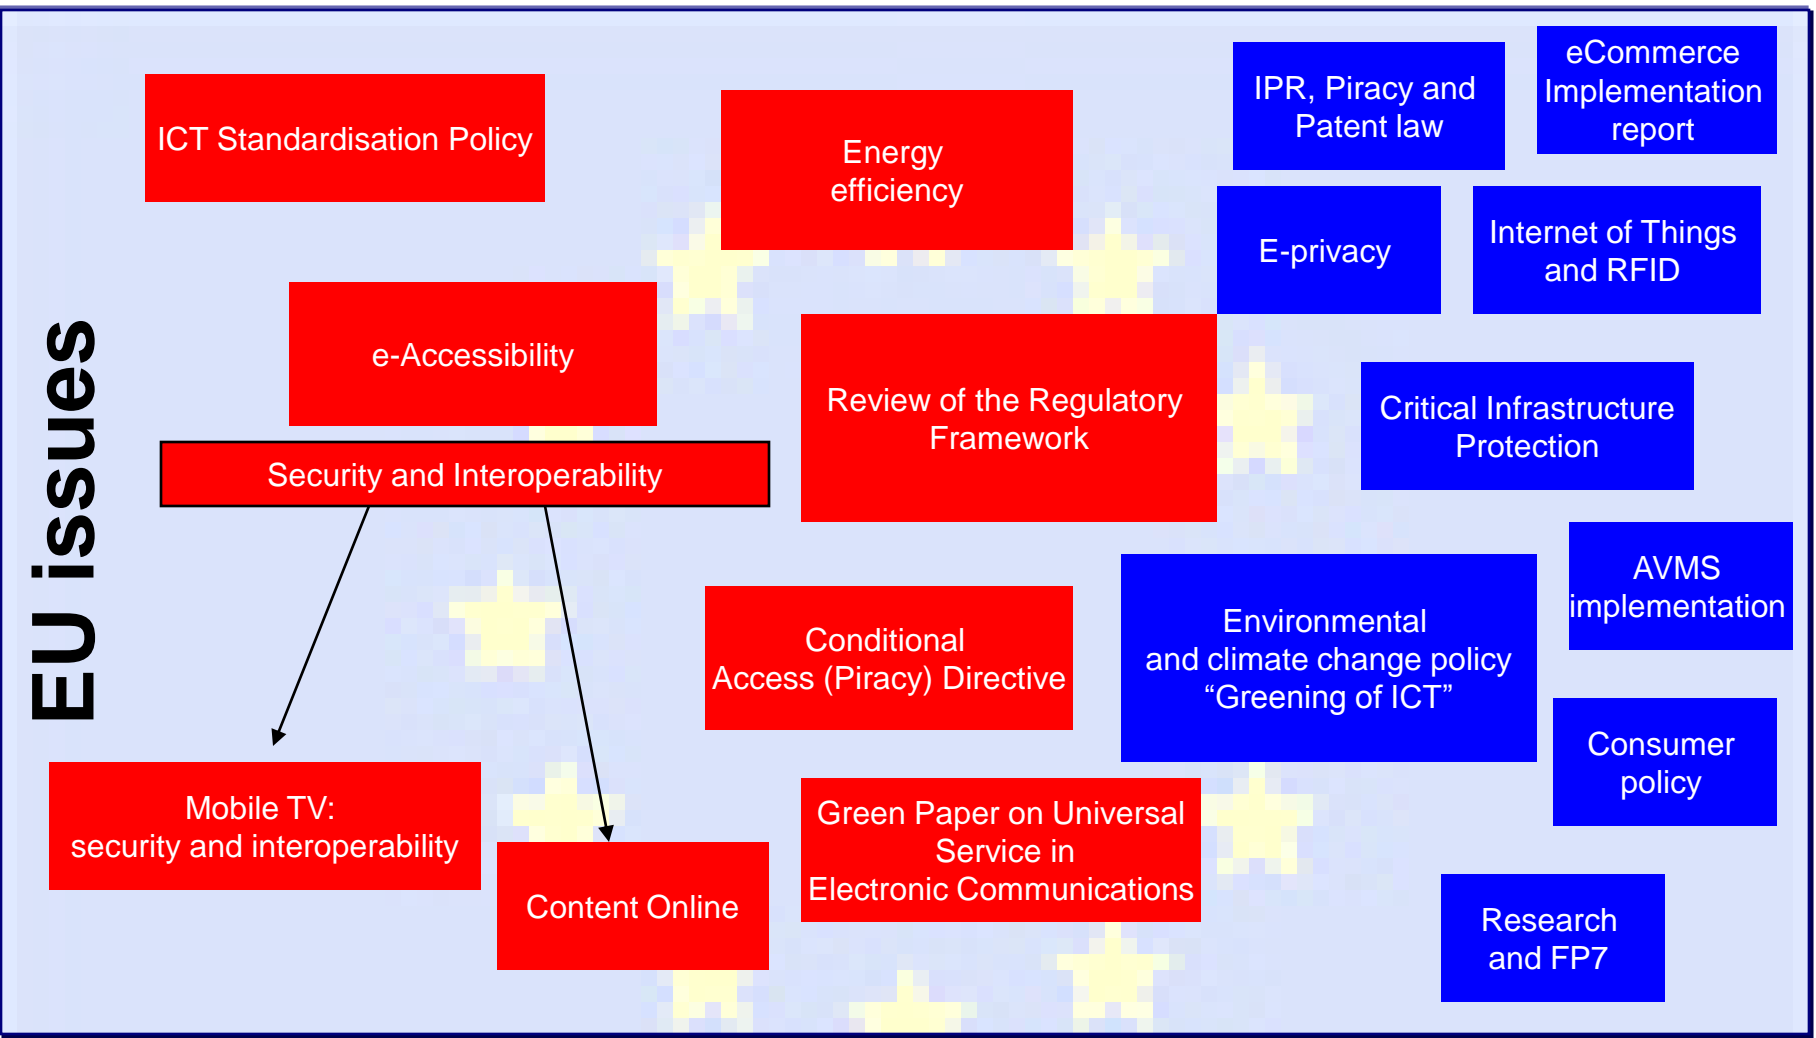

# Mission statement

*To enable the European consumer to choose from a wide selection of attractive options for digital television and multimedia services on a range of platforms and devices, by **promoting industry-led solutions to interoperability** issues and advocating a light-touch regulatory regime which provides the industry with the flexibility to innovate and the confidence to invest*

- Promoting Interoperability
- Innovating for Interoperability
- Investing in Interoperability
- Implementing Interoperable Solutions

- Maintains a public profile through events, presentations, etc...
- Promotes the key principles and commitments of DIF to all relevant audiences
- Seeks representation for and active involvement of DIF in relevant European fora
- Maintains awareness throughout its membership of all relevant developments
- Collaborates, where practicable, on communications strategies
- Welcomes new members who are committed to interoperability
- Facilitates members' engagement with issues where there may be no DIF common position

# Current and Future issues

- Acquis = accumulated body of EU law.
- Areas of DIF involvement in red / new areas in blue
