Our Mission

"To enable the European consumer to choose from a wide selection of attractive options for digital television and multimedia services on a range of platforms and devices, by promoting industry-led solutions to interoperability issues and advocating a light-touch regulatory regime which provides the industry with the flexibility to innovate and the confidence to invest."

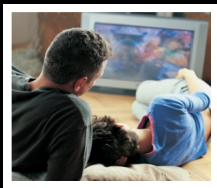

Our Members

DIF's growing membership includes many of the leading companies in the delivery of digital TV in Europe: BSkyB, CANAL+, Conax, Deutsche Telekom, Irdeto, Liberty Global, Microsoft, Nagravision, NDS, Qualcomm, Pace Micro Technology, Sky Deutschland, Sky Italia, Viaccess and ZetaCast.

Key Topics

- Interoperability
- Digital Piracy
- ICT Standardisation
- Greening of ICT
- Online media
- eAccessibility

Activities

- Promotes the key principles and commitments of DIF to all relevant audiences
- Maintains a public profile through events, presentations and internet
- Seeks representation for and active involvement of DIF in relevant European fora
- Maintains awareness throughout its membership of all relevant developments
- Collaborates, where practical, on technology policy, regulation and communications strategies
- Welcomes new members who are committed to interoperability
- Facilitates members' engagement with issues where there may be no DIF common position
